

ASTTBC Sponsors Camosun College's Capstone Symposium

ASTTBC Council Member, David Sparanese, AScT, CPWI 3 (far right) joins Mel Dundas, Instructor of Electronics & Computer Engineering Technology (far left) and Alan Duncan, Chair (second left) reviewing student innovations

ASTTBC was a proud sponsor the recent Camosun College Capstone Symposium. The event showcases projects from the graduating students of the Electronics & Computer Engineering Technology Program.

The [DOUGLAS Business Magazine](#) featured the Event and provided details on the student's presentations.

[David Sparanese](#), AScT, CPWI 3 ASTTBC Council Member, attended on behalf of ASTTBC and was duly impressed with the quality of the showcase. David went on to say... *"It was a pleasure for me to return to my former school; not as a student thankfully, but on behalf of the Council of ASTTBC to attend the Camosun College, Electronics and Computer Engineering Technology - Capstone Symposium. The projects that I saw were very interesting, innovative and forward thinking. With some fine tuning and marketing, some of the projects were almost ready for mass production and available for the consumer market. I would like to extend my congratulations to the faculty and students that participated in the event. Keep up the great work; you are the future of Electronics and Computing Technology!"*
