Onsite Wastewater Survey 2014

ASTTBC surveyed all Registered Onsite Wastewater Practitioners (ROWP) in 2013 and has now issued a Report. This survey was built on the first survey published in 2010 and provides critical information on the state of the industry.

“The Report will provide useful information to guide ASTTBC, the Ministry and industry decision-making as we consider future directions for this sector,” said ASTTBC CEO John Leech. “Thanks to Keith Gylander of Gycor Dynamics for his work in conducting the survey and preparing the Report.”
