The Natural Resource Forum was ramped up this year with Premier Clark leading the 2014 event. The Forum provides an opportunity for industry leaders to share their vision and plans for resource development; and ASTTBC has been a regular sponsor and contributor for years. ASTTBC's purpose is to showcase the roles and responsibilities of BC's Technology Professionals.

"ASTTBC achieved a solid presence at the Prince George-based event," said ASTTBC CEO John Leech. "As usual we had the opportunity to connect with industry, education and government leaders." The Premier convened a Liberal Caucus meeting in Prince George and as result most Liberal MLAs were in attendance. "ASTTBC members contribute a great deal to the BC resource sector. It is important that the Association attend events such as this to highlight the professional role of technologists, technicians and technical specialists," concluded Leech.
