

April 2012

Building Regulatory System – Survey Closing Extended to April 30

The Building and Safety Standards Branch would like your feedback on proposals to modernize the building regulatory system and introduce mandatory certification for building officials. They have posted a survey on their website that includes questions on each proposal, as well as questions on a proposed levy to fund some proposals.

They have extended the survey closing date to April 30. If you have not yet had an opportunity to provide your thoughts, please visit <http://www.housing.gov.bc.ca/mod/consult.htm> and select the appropriate survey link (for industry or for elected officials, local government administrators and staff). The link also provides access to the White Papers and a presentation on the proposals for your review.

Thanks to ASTTBC Members for taking the time to participate in this important process to ensure our position is made known.
