ASTTBC President Featured in BC TECH

For the fourth year ASTTBC placed a one page full colour advertisement in the Business in Vancouver 'BC TECH', a special edition that focuses on BC's high technology business and organizations. In this advertisement, located prominently on page 3, ASTTBC featured ASTTBC President, Doug Carter, CTech, and his role at the University of Northern British Columbia. As Capital Projects Manager, Doug is directly involved in planning and development of the Bio-Energy Program for UNBC. "This is a great way to draw attention to ASTTBC's technology professionals and ASTTBC as well as feature one of our members and his work in sustainability," said Executive Director, John Leech. "It is a great fit with ASTTBC's recently announced TechGREEN Award."
