ASTTBC Feature in Prince George Free Press

March is National Engineering & Geoscience Month and ASTTBC is an active supporter. ASTTBC is involved with many activities this month as part of this Association's effort to promote engineering & geoscience technology education and careers. Included is a special four-page feature in the PG Free Press where ASTTBC profiles several members, talks about ASTTBC's role as a professional regulatory body and provides information on key issues facing our profession. College of New Caledonia (CNC) President, John Bowman, talks about new technology programs planned at CNC. "This is a great opportunity to profile ASTTBC and our technology professionals," said Executive Director, John Leech. "ASTTBC plans to ramp up this local effort in other areas of the province in 2013." <http://www.asttbc.org/docs/pgfreepress.pdf>
