Executive Director on the Jim Harrison Show-Radio NL in Kamloops

ASTTBC Executive Director talked technology education and careers and science & technology awareness in K-12 on the Jim Harrison Radio Show in Kamloops. Referencing ASTTBC's involvement in National Engineering & Geoscience Month (March) for the first time, John Leech stressed the importance of math, science and technology for all students studying in K-12. He spoke about careers in the sciences and pointed out that BC will again face a crisis if we do not attract more youth to technology careers.

Leech was in Kamloops on March 22 and 23 and during his visit he hosted many industry leaders to a lunch meeting and presented a cheque to the Big Little Science Centre.

Thanks to Tara Gostelow the program producer, ASTTBC received a copy of the interview.
