ASTTBC Input Requested for National Energy Code for Buildings

The province of BC would like to invite you to contribute to the development of building, plumbing, fire and energy codes in BC.

The BC codes are based substantially on the model National Building, Plumbing, and Fire Codes of Canada and the National Energy Code for Buildings (National Codes). Changes made to the National Codes will be considered for adoption into the next editions of the BC codes.

Changes to the National Codes are currently posted for public review [HERE](#)

The public review closes at 4:00 pm EDT on October 31, 2014

Thank you for your participation in this important process.
