ASTTBC Member Develops Earthquake Technology

ASTTBC President Bill MacPherson, ASCT, (left in photo) presents Ian Bowman, ASCT with his Advanced Technology Award in recognition of his newest technology development.

ASTTBC Member, Ian Bowman, ASCT, and President and CEO of Softac Systems Ltd, was featured in a recent edition of *Business in Vancouver* highlighting his company's newest Earthquake Technology QuakeTrip.

The QuakeTrip's main function is to detect wave acceleration peculiar to earthquakes and to automatically shut off utilities. This device would have enormous impact on residual damage caused by earthquakes in particular fires caused by ruptured gas and power lines. Both the City of Surrey and the US Government have placed orders with Softac Systems.

Ian was presented an Advanced Technology Award by ASTTBC at this year's Technology Awards and Recognition Celebration in recognition of his development of this new technology
