## **ASTTBC Executive Director re: Building Code Renewal – Radio NL in Kamloops**

On the BC Government appointment of a Minister of State for Building Code Renewal John Leech, Executive Director of ASTTBC indicated that this is a positive initiative and a great opportunity for industry, professional associations and other stakeholders to work with Government to define and address key issues with the built environment.

Saying that currently we have a fractured system, Leech indicated that he anticipates Minister Naomi Yamamoto will consult widely to define the issues and then map out strategies to move toward a more effective system. John was interviewed by Jim Harrison on Radio NL in Kamloops. For the interview (turn up the volume as the audio feed was not the best) go to:
