ASTTBC and Minister Stilwell at BCIT: Year of Science

The Honourable Moira Stilwell was the lead Cabinet Minister on the YEAR OF SCIENCE initiative. Minister Stilwell was at BCIT recently and ASTTBC's Geoff Sale, AScT, Manager, Internationally Trained Professionals was on hand and had the opportunity to have a photo taken with the Minister. ASTTBC is one of the recognized organizations under the Year of Science program (<http://yearofsciencebc.ca/>). "The Minister spoke of the importance of enhancing awareness of science and technology and supporting young boys and girls as they consider their career options. She stressed the importance of sciences and math in the K to 12 year" said Geoff Sale. "I was pleased that the Minister took a little time to talk with me about ASTTBC's role and the contribution of technology professionals in BC." Responsibility for Year of Science has since moved to Minister of Science and Universities, Ida Chong.
