CSO Survey Results

ASTTBC has recently undertaken a survey of all CSO members and are pleased to share the results with you.

The response rate was excellent, well above the standard for online surveys and we thank all those who took time to share their opinions with us.

As with all surveys there were positive and constructive comments and that is what we wanted. There is obviously very strong support for the CSO Certification being provided by ASTTBC as a professional association and recognition of the unique benefit that it brings to your credential.

Your opinions echoed what we have been hearing from members and will most certainly help guide us as we look to future improvements for the CSO Certification Program.
