### FIELD TECHNOLOGIST

Due to a steady and expanding workload we are looking to add technical depth to our company. We are seeking motivated and insightful people wanting new and interesting challenges as a field technologist on municipal engineering projects. Applicants who enjoy working in a progressive and collaborative environment with like-minded people are encouraged to apply.

The successful candidate will generally be responsible for construction inspection and related field work. Tasks will cover all aspects of the construction cycle including field layout, site inspection, contract administration, testing coordination, and record drawing preparation. The candidate will have 5 to 8 years of progressive project experience. Preference will be given to those with topographic survey and construction layout experience and are capable of operating robotic survey equipment. Registration with ASCT would be an asset, but it is not critical.

We are a local, well-established firm in Parksville B.C. with deep ties to the region and with a strong presence in the municipal infrastructure and development community. We offer you the opportunity to gain considerable experience on large, complex and challenging design and construction assignments, with a chance to utilize new technology as you advance your career. We provide progressive training opportunities with the possibility of ownership for the right candidates. Please see our website for further information about our company and the opportunities that we offer.

If you are interested in a chance to work on Vancouver Island with highly experienced people on exciting and rewarding projects and would thrive in an employee owned company, then please submit your resume and a brief cover note by email to [kael@koers-eng.com](mailto:kael@koers-eng.com) , by April 30<sup>th</sup>, 2017.
