

Westbrook Consulting Ltd. is a privately owned local engineering company. We are a leader in Municipal Infrastructure Design and Land Development engineering in the Greater Victoria area.

We bring an open friendly team approach to the design process where input is welcome from all parties. Satisfied repeat clients and client referrals make up over 80% of our work load.

Westbrook Consulting offers competitive salaries and benefits. We currently have an opportunity as follows:

### **INTERMEDIATE DESIGN TECHNOLOGIST**

This is a key position in our design group. You will serve as one of our team of design technologists. Your duties will include:

- Overall responsibility for project design, reporting to the project manager
- Reviewing design work of junior staff from time to time
- Liaising directly with clients, architects, other subconsultants, municipal officials, contractors and field staff
- Detailed design and drafting of sanitary sewer, storm water management, water supply and roadworks on both private sector and publicly funded projects
- Mentoring junior staff

You have the following qualifications:

- 5 - 10 years of experience in municipal infrastructure design and drafting
- Registration or ability to register as an ASCT or CTech
- Fluent in Autocad Civil 3-D 2017

In addition, experience with other software such as Autoturn, EPA SWMM, EPANET or other modeling software and previous construction inspection experience are considered assets.

Westbrook offers competitive wages, group benefits and a group RRSP program.
