

ASSET Reliability Division – JUNIOR STRUCTURAL ENGINEER/TECHNOLOGIST

CWA Engineers Inc. (CWA) is an industry leading consulting engineering firm that provides services in the ports and marine terminals, mining and minerals, infrastructure and wood products industries to clients across North America and around the world.

With our expanding client base and growing project needs CWA is looking to add a **Junior Structural Engineer/Technologist** to our growing Asset Reliability Division.

The Junior Structural Engineer will be working under the direction of the Asset Reliability Division Manager. Duties include performing equipment and facility inspections; compiling and writing reports; preparing designs; and coordinating with internal and external parties.

The ideal applicant will possess the following qualifications:

- A Bachelor's Degree/Diploma in Civil Engineering (structural) and is eligible for registration as an EIT/Technologist with APEGBC/ASTTBC.
- Excellent communication and interpersonal skills.
- Demonstrated ability to interact with co-workers, clients and contractors.
- Strong attention to detail.
- Willing to work with a team to complete field inspections of heavy industrial equipment.

This is an ideal opportunity for a professional who is driven to take his or her career to the next level by assuming new challenges within a fast-paced and growth-oriented environment.

Qualified applicants are invited to submit a cover letter and resume to

CWA ENGINEERS INC.
