

Civil Technologist/Inspector

Overview:

Our Water sector, which brings together many of the world's top engineers and scientists, sees water a bit differently—as a single holistic system rather than as unconnected networks divided by jurisdictional boundaries. We use this perspective to help communities tap into water's potential. Throughout the life cycle of capture, use, reuse, and discharge, our team optimizes every facet of a water system. Whether a project calls for planners, designers, construction managers, or facility operators, we have the right experts to provide creative, yet practical, water solutions. Through our cost-effective strategies, we're helping communities increase their water efficiency and protect their water resources for future generations. Join our team as we create new ways to tap into water's vast potential.

Our **Surrey** office has an opportunity for a **Civil Technologist/Inspector** within the Water group.

Responsibilities:

Working in conjunction with the Senior Staff leading Stantec's team, your responsibilities will include:

- Contract administration, cost- controlling, quantity surveying, contract co-ordination, construction progress monitoring and preparation of reports.
- Assessing and resolving site-related construction challenges.
- Leading work progress review meetings, including documenting the discussion and action items.
- You will be expected to lead progress payment reviews and evaluations.

Qualifications:

- Diploma of Technology in Civil Engineering or Bachelor's degree in Civil Engineering along with 5 years' experience related to design or construction in municipal infrastructure (pump stations, road works, pipelines and flood protection works).
- Knowledge of codes, municipal design standards and design guidelines such as MMCD Design Guidelines.
- Effective oral and written communication skills.
- Proficient in the use of MS Office software, particularly with Excel spread sheet.
- Experience with design software such as AutoCAD and Civil 3D.
- Have or eligible to obtain a valid British Columbia Class 5 Standard Driving License.
- Excellent interpersonal skills and ability to deal effectively with clients, the design team and contractors in the resolution of construction issues.
- Have or access to personal vehicle for use on / off project sites.
