

BC BUILDING SCIENCE

BUILDING ENVELOPE & ENERGY CONSULTANTS

ARCHITECTURAL TECHNOLOGIST

BC Building Science is looking for an experienced Architectural Technologist to join our successful team. The main role involves design and drafting services for building envelope aspects of new construction and renovation construction. Candidates with a diploma in architecture or building construction (BCIT) are preferred.

BC Building Science is a professional engineering firm, specializing in building envelope and structural design for the residential and commercial construction industry in British Columbia, Alberta, Ontario, Washington, and California. BC Building Science has had continued sustainable growth over the last 21 years, through delivering high-quality and creative engineering solutions to an outstanding group of successful clients.

The successful candidate will be:

- highly skilled in drafting and design with a strong ability to think and visualize in 3d;
- experienced and familiar with local construction methods and materials;
- knowledgeable in the field of building science, particularly in construction detailing and integration of components and assemblies;
- naturally talented in design and graphics;
- an intelligent creative thinker with high attention to detail; and
- able to use Autodesk AutoCAD and Autodesk Revit.

The main functions of the successful candidate are:

- preparation of drawings and specifications for building envelope renovations and repairs;
- development of architectural design concepts and repair strategies for existing buildings;
- preparation of isometric details of construction assemblies;
- other duties, which may include assisting with Contract Administration, Specifications, Quantity Take-offs, Depreciation Reports, or other similar types of services and reports.

BC Building Science is offering a competitive salary depending on experience and qualifications, with the opportunity to increase the salary based on the individual's knowledge, motivation, and performance. We offer an extended health benefits program, profit sharing, and RRSP package.
