

# BC BUILDING SCIENCE

## BUILDING ENVELOPE & ENERGY CONSULTANTS

### ROOFING TECHNOLOGIST / INSPECTOR

BC Building Science is looking for an experienced Roofing Technologist / Inspector to join our successful team. The main role involves the technical review of roofing and waterproofing installations as well as assisting with water penetration testing for new and renovation construction. Candidates will ideally have credentials and training in local roofing practices: RCABC, RRO, RRC.

BC Building Science is a professional engineering firm, specializing in building envelope and structural design for the residential and commercial construction industry in British Columbia, Alberta, Ontario, Washington, and California. BC Building Science has had continued sustainable growth over the last 21 years, through delivering high-quality and creative engineering solutions to an outstanding group of successful clients.

The successful candidate will be:

- knowledgeable about roofing and waterproofing aspects in building construction;
- experienced and familiar with local construction methods and materials;
- particularly knowledgeable in the field of building science and building envelope design;
- skilled in technical writing and will have excellent communication skills – written and oral;
- an intelligent creative thinker with high attention to detail; and
- able to use Microsoft Office programs (Word, Excel, Outlook).

The main functions of the successful candidate are:

- reviewing roofing and waterproofing aspects of the construction of wood framed and concrete structures from single family homes, to high-rise residential towers, to commercial and institutional buildings;
- enhanced field review / quality assurance audits and technical report writing;
- building envelope field testing and commissioning; and
- communication and ongoing construction correspondence with related parties including Developers, Contractors, and Architects.

BC Building Science is offering a competitive salary depending on experience and qualifications, with the opportunity to increase the salary based on the individual's knowledge, motivation, and performance. We offer an extended health benefits program, profit sharing, and RRSP package.
