

Engineering Supervisor

Weldco Companies, comprised of Weldco-Beales Manufacturing alongside Weldco Hydra-Lift and Weldco Heavy Industries are active participants in the heavy steel industry. Weldco-Beales Manufacturing (WBM) manufactures heavy equipment attachments while Weldco Hydra-Lift manufactures truck mounted cranes for the construction, forestry, mining and resource industries throughout Canada, U.S.A. and internationally. Weldco Heavy Industries is a steel repair and fabrication facility located in the heart of Alberta's oilsands.

A challenging opportunity exists in our manufacturing facility located in Langley, BC for an Engineering Supervisor. The Engineering Supervisor will be an excellent communicator, a leader by word and example, and exceptional technically. Ensuring safe, efficient and profitable operations while achieving departmental goals and objectives, the Engineering Supervisor also demonstrates commitment to superior customer service through supporting on time delivery and ensuring quality products.

If this appeals to you, please read on...

Guided by strong ethics, sound business judgment, and technical expertise you are adept in the following:

- You are a big picture thinker who can break it down into tasks for the team to deliver on-time, high quality products while staying on budget.
- You are an outside-the-box thinker with excellent problem solving abilities
- Leadership capabilities such as coaching, developing people, and succession planning are strengths of yours
- Ability to track current jobs in progress and keep staff on task by closely following an engineering schedule.
- Embracing new technology and responding effectively to changing conditions in an environment where continuous improvement is a must
- You understand that business priorities change and are able to flex your resources to ensure these priorities are met.
- You are known for driving continuous improvement within your department and always striving to reach above the status quo
- Promoting and enforcing workplace safety is of great importance to you

You will have the following experience and credentials:

- Recognized Mechanical Engineering Degree or Diploma
- A minimum of 7+ years of related experience of which 2+ years would be at a leadership level
- Experience in coaching, mentoring, and training employees
- Industry experience is an asset
- In-depth knowledge of equipment design, engineering theories and usage, required design software(Solid Works and AutoCad) and usage, steel properties and usage, steel manufacturing and its processes and the manufacturing industry, our Company, products and services
