

Add New “Flare” to Your Career

Inspired by architects, guided by builders, manufactured to perfection. Montigo is a local success story and the best kept secret in custom manufactured gas fireplaces for both commercial and residential purposes. Headquartered in Langley and an innovator in its field, Montigo offers the largest selection of linear fireplaces for designers, architects and homeowners wanting to create a modern and contemporary space. We are growing and are looking for a self-starter to join our team as our next...

Testing and Product Certification Technologist

As a key member of the R&D and Residential Product Development team, you will continuously push the boundaries and capabilities of next generation hearth designs and manufacturing methods. With on the job training provided from a supportive group of people, you will develop into the in-house expert on testing procedures, standards and protocols, serving a vital role on our technical team.

Responsibilities

- Extensively test and evaluate all design concepts and prototypes, including analysis and reporting of data and results
- Ensure all products are safe, reliable, attractive, innovative and meet customer specifications by following certification standards and internal manufacturing requirements
- Work with certification authorities to maintain and obtain certification for our products in all markets, including participation in industry meetings and maintaining familiarity with regulations
- Manage the test facility, including test planning, equipment and generating auditable records of test work
- Inform the design of next generation of products as it relates to changing industry regulations and trends, especially safety, testing requirements or efficiency standards
- Work closely with the designers and production team on design and process improvement
- Assist the service support team with technical inquiries and customer problem resolution
- Assist with trade and marketing show preparations

Required Certifications and Experience

- Positive attitude with a love for problem solving and attention to detail
- Technical diploma or Engineering degree
- 3+ years of experience in a R&D, laboratory, product development or manufacturing setting
- Forward thinking, self-motivated and analytical problem-solver who has a mind for both numbers and technology
- Well-versed in the set up and running of manufacturing related tests
- Organized, detail-oriented and thrive on process and safety
- Able to handle multiple projects concurrently within specified timelines
- Adept at data collection and analysis, with experience providing detailed documentation of testing results
- Advanced Excel skills
- Skilled at using power and hand tools, with an ability to perform light fabrication, assembly and modify appliances, electrical components, gas components and sheet metal parts for testing
- A strong communicator who is able to work well with skilled fabricators, production staff and certification authorities
- Experience with HVAC, electrical, gas products or combustion testing and/or SolidWorks an asset

If this sounds like you and you want to be a part of this exciting, growing company, we want to hear from you! To express your interest in this opportunity, please send a cover letter and resume by Friday, October 6th to careers@montigo.com, with Attention: Testing and Product Certification Technologist in the subject line.
