

DRAFTING TECHNOLOGIST

Northwest Hydraulic Consultants (NHC) is an international firm of civil engineers and geoscientists providing professional services for the development, management and protection of water resources. We are currently seeking a drafting technologist to participate in our river engineering, hydrology and geomorphology projects within our North Vancouver, BC office. Candidates with up to 5 years of pertinent experience are encouraged to apply.

Proficiency with AutoCAD and Civil3D is required; and experience working with survey processing software, digital terrain modelling, GIS, total station surveys and GPS-based surveys will be an asset.

The successful candidate will be a self-motivated individual with a demonstrated ability to work independently and to prioritize multiple tasks to meet tight deadlines. She/he will demonstrate a commitment to high quality, client service and excellent communication and organizational skills, and will be expected to use her/his skills to improve the quality and efficiency of our products.

NHC offers a competitive salary and comprehensive benefits package, including annual merit-based bonuses. Most importantly, we offer the opportunity to work with like-minded individuals in an independent and specialized firm on technically challenging and satisfying projects.

If you are interested in joining our team, resumes can be sent in confidence to CGriffiths@nhcweb.com.

Only applicants selected for an interview will be contacted. Please visit our website at www.nhcweb.com for more information.
