

ENGINEERING TECHNOLOGIST

Northwest Hydraulic Consultants (NHC) is an international firm of civil engineers and geoscientists providing professional services for the development, management and protection of water resources. We are currently seeking engineering technologist candidates with strong skills in geomatics, surveying, hydrometrics and computer-aided drafting to participate in our river engineering, hydrology and geomorphology projects. The position will be based in NHC's North Vancouver office, but project work will be throughout BC and Western Canada.

Experience with total station surveys, GPS-based surveys (static, RTK and DGPS), and hydrographic surveying is required; and experience with hydrometric stations, flow gauging (ADCP, ADV, and dilution) will be beneficial. Proficiency with data reduction software, excel, ArcGIS and drafting packages such as AutoCAD and Civil3D will be a definite asset.

The successful candidate will be a self-motivated individual with a demonstrated ability to work outdoors and an interest overseeing the maintenance of field equipment. You should demonstrate a commitment to high quality, client service and excellent communication and organizational skills and be willing to travel throughout BC and Alberta. Previous experience with rope work, water sports, hiking and/or mountaineering would be beneficial.

NHC offers a competitive salary, comprehensive benefits package, including annual merit-based bonuses. Most importantly, we offer the opportunity to work with like-minded individuals in an independent and specialized firm on technically challenging and satisfying real-world projects.

If you are interested in joining our team, resumes can be sent in confidence to CGriffiths@nhcweb.com.

Only applicants selected for an interview will be contacted. Please visit our website at www.nhcweb.com for more information.
