

CFT Engineering Inc.

CFT ENGINEERING INC - BURNABY BC

Building Code Consultants Fire Protection Engineers & Technologists

CFT Engineering Inc., founded in 1992, is seeking qualified individuals to join our office team in Burnaby, BC at intermediate and senior levels. The successful candidates should have knowledge of the local design / development community and experience in the field of Building Code Consulting and Fire Protection Engineering.

CFT Engineering provides Building and Fire Code consulting and Certified Professional services for a wide variety of projects including complex multi-use sites; high rise buildings, institutional buildings; low and mid-rise wood frame residential; and high hazard industrial facilities. We also provide third party review for local authorities, and engineering studies for various levels of government and private industry.

The applicants should be registered or working towards registration as a Technologist in British Columbia, with related work experience.

CFT Engineering provides competitive compensation and benefit package with a potential to participate in future ownership of the company for the right candidates.

If you have the right skills and experience, and are interested in furthering your career in a dynamic work environment, please submit your cover letter and resume in confidence to bwalton@cftengineering.com
