

FIELD SERVICES INSPECTOR, INFRASTRUCTURE

ROSSLAND, BRITISH COLUMBIA

WSP is one of the world's leading professional engineering services firms. Every day our more than 34,000 experts work to restore the natural environment and transform the built environment.

In Canada, our 8000+ people are involved in everything from environmental remediation to urban planning, from engineering iconic buildings to designing sustainable transport networks, from finding new ways to extract essential resources to developing renewable power sources for the future.

The excellence we bring to our work and to our workplace has been recognized far and wide. We're a Forbes Top Employer in Canada, one of the Top 100 Sustainable Companies in the World (and among the Top 10 in Canada), and we earned Platinum Elite Recognition through our participation in more than half of Canada's Top 100 Infrastructure Projects.

At **WSP**, we're proud, professional and passionate people. Join us.

POSITION DESCRIPTION

Are you looking for an opportunity in the city which has a beautiful ski hill, elevated nature beauty, and unassuming charm – Rossland? Are you looking for an opportunity for a variable work week (depend on seasonal project demands) that can provide you more time for skiing in the winter? WSP has an excellent opportunity!!!

WSP is currently seeking a Field Services Inspector to join our Infrastructure group, located at our Rossland office. Reporting to the Senior Project Manager, this position will be responsible for assisting in the preparation of engineering drawings for land development, water resource, transportation and municipal projects.

RESPONSIBILITIES

- Provide assistance in the preparation of conceptual, through to final engineering documents, including grading plans, servicing plans, municipal infrastructure plans, and road design;
- Ability to interpret construction documents, accurately perform mathematical computations, review and interpret engineering data, and make sound decisions;
- Assist project managers with contract administration and budget tracking;
- Gather and interpret current mapping information such as contours, roads, vegetation, watercourses, etc. and evaluating their impacts on project design;

- Responsible for the proper field construction of WSP projects when required, under the direction of the Supervisor, Field Services.
- Maintain communication with contractors, stakeholders, and project manager regarding status of project;
- Gather field information / data / measurements during the construction process for translation into revised drawings, record drawings and completion documentation;
- Manage field data records, testing sheets, drawing markups, and geotechnical testing reports;
- Maintain organized filing of construction projects using active filing and the main central system; and
- Other duties as assigned.

QUALIFICATIONS

- An undergraduate degree or diploma in civil engineering from an accredited university or college;
- 2+ years of progressive experience in the municipal infrastructure and transportation projects;
- Good initiative, attention to detail, and excellent time management;
- Ability to work in a team environment;
- Ability to work independently and have a self-starter attitude;
- Willingness to travel to the various project locations if required;
- Knowledge of MMCD contracts and specifications is an asset;
- Experience in AutoCAD and Civil 3D is an asset; and
- Excellent verbal and written communication skills.

Offers of employment for safety-sensitive positions involving fieldwork are contingent upon candidates being able to perform key physical tasks of the job as described in the job posting and interview. This may include the ability to work in a variety of environmental conditions, such as remote or isolated areas, working alone, and in inclement weather (within safe and reasonable limits).
