Drafting / Quality Control Technologist

NL Engineered Precast Products is seeking a motivated, flexible individual for the full-time position of Drafting / Quality Control Technician. We are interested in an individual that is a Civil Engineering Technologist, Professional Engineer (or EIT) or experienced in precast concrete manufacturing. This position requires an individual who is detail-oriented with excellent drawing interpretation skills and a basic understanding of concrete testing procedures. Responsibilities for this position includes:

- Drawing and specifications interpretation
- Creating shop drawings with AutoCAD
- Material and Product Inspection including:
 - Raw material inspection
 - Finished product inspection
 - Aggregate testing
 - Concrete testing
 - Documentation of all related QC information

This is a full-time position: Monday-Friday, 40-50 hours per week, with compensation commensurate with experience and qualifications. All work would be performed at our manufacturing facility in Armstrong. Estimating and Project Management opportunities are also available within this position.

Interested candidates can send resume and cover letter to james@nlepp.com, subject: QC-Drafting Position or through our online application at nlepp.com/employment.
