

We provide world-class instruction and a rich diversity of engaging programs to inspire success for every student and bring communities together to learn, share and grow.

## DDC Controls Service Technician

***Maintain a comfortable school environment for all users of District facilities***

Our students and staff spend a good deal of their day in our schools. Like us, you are committed to providing them with the safest and healthiest learning and work environment possible. By applying your background in controls technology, you will service and troubleshoot the Direct Digital Controls (DDC) that regulate our heating, ventilation and air-conditioning (HVAC) systems so they provide optimal indoor air quality, adequate ventilation and thermal comfort to our premises.

For the most part, you will work behind the scenes to maintain, repair, install and commission systems. From time to time, managers and administrators will look to you for technical advice and assistance, and you will be called on to mentor external service and mechanical trades and technicians. Whether you are providing timely troubleshooting or modifying operating schedules, you always prioritize your time well to get the job done and are always at the ready when an emergency arises.

Your degree in computer science or diploma in controls technology and your successful completion of vender-specific automation system training are ideally combined with over 3 years' experience troubleshooting complex DDC building systems (equivalent education and experience will also be considered). Staying current with the latest DDC technological developments and regulations, you also round out your knowledge with a deep understanding of computerized DDC software and hardware for HVAC.

From our coastal beaches to our mountain forests, North Vancouver's natural setting offers year-round recreational opportunities. Our school district's values of accountability, creativity, collaboration and collegiality make it "the natural place to learn" for students, and "the natural place to work" for our staff.
