

## Structural Drafter (CAD & BIM Technologist)

Specializing in structural engineering, building science, structural restoration, structural glass and façade engineering and parking facility design and restoration, RJC Engineers is one of North America's leading engineering firms. With a staff of more than 500 employees in eleven locations across the country, we offer highly personalized service at the local level with the expertise, depth and resources of a large, national firm.

We are proud of our ability to balance creativity with practicality to help our clients achieve their vision. To us, creativity means working collaboratively to find distinctive and effective solutions for every project, developing new techniques and processes when called for, and knowing how and when to adapt proven methods and apply the most beneficial technology.

**Creativity starts with the ingenuity of our people.**

We have a culture of learning and facilitating growth of skills and capabilities; of helping our people fulfil their potential through coaching, teamwork, challenging work assignments and open communications. We strongly believe that if you feel engaged and driven to excel, you will enjoy your daily work experience, and that will result in a level of service that will keep our clients coming back.

Location: Vancouver, BC

Start Date: As soon as possible

### Candidate Profile

As the CAD/BIM Technologist your Structural drafting knowledge is sound. You know how a building goes together, and what a great set of drawings should communicate. Strong communication skills and a fast learner, you enjoy taking on more responsibility and have a desire to grow personally and professionally.

### Key Responsibilities

Duties include, but are not limited to:

- Develop finished building models and drawings from general conceptual information and design notes
- Co-ordinate RJC's drawings with those of other disciplines on projects
- Provide project drafting and be accountable for schedule and efficiency
- Be accountable to Project Engineers for drawing production and quality
- Help the design be more easily communicated through your drawings
- Work as part of a team, to produce drawings on a variety of projects
- Co-ordinate and overlay drawings of other team members to resolve drawing co-ordination in development of detailed design of projects

### Professional Qualifications & Experience

- Certificate in Civil/Structural drafting or technology from accredited Technical College
- 1-2 years working experience or education background with AutoCAD and REVIT

- Experience in construction and/or consulting services an asset

\*This position includes a comprehensive group benefits package, discretionary performance bonuses, and annual salary reviews.
