

**Manager, Underground Utilities
Engineering and Public Works Department
(Regular Full Time)**

City of Victoria is looking for an experienced Manager to oversee Underground Utilities Operations – sewers, storm water, construction, maintenance and related programs in support of the Engineering Department’s annual operating plans and capital projects.

Reporting to the Assistant Director of Public Works, you will be overseeing a staff of 50+ Waterworks and Underground Utilities operations staff. You may be an engineering graduate or CET with progressively responsible supervisory experience in municipal engineering construction and management. Registration as an Applied Science Technologist (AScT) with ASTTBC preferred.

Professional development has been an important part of your career growth and you have a thorough understanding of the Environmental Operators Certificate Program (EOCP). You are comfortable and effective dealing with internal stakeholders as well as private sector contractors and developers.

A competitive salary, excellent benefits and superior pension plan are all a part of this exciting opportunity as is joining a high functioning, effective team. This position is excluded from union membership.
