

Where ideas work

**BC Ministry of Transportation and Infrastructure
Quesnel**

**Area Manager, Roads
Salary \$61,665.45 - \$70,367.02 annually**

A vital leadership role maintaining the safety of roads and bridges - make a difference in your community!

The Cariboo District Team is seeking a new member for the role of Area Manager, Roads in the beautiful city of [Quesnel](#). If you have a background in road maintenance, construction or bridges, enjoy interacting with people and being a member of a positive team, you'll want to take advantage of this opportunity. The Cariboo District team embraces innovation in a relaxed but professional work environment, and has many unique opportunities to broaden your experience.

The primary function of the District is to ensure the safe and efficient movement of goods, services and people in a given geographic area. The District administers the road and bridge maintenance contracts, provincially totaling \$320 million annually, portions of the rehabilitation program, development approvals and support for the provincial capital program. The operations of each District support the growth and development of the provincial economy. District operations are a direct link between the ministry and the public/stakeholders providing a key transportation link in a multi-modal environment.

The Area Manager, Roads will identify overall program priorities and to ensure the preservation and improvement of the road infrastructure for the safety and convenience of the travelling public. In unison with the Operations Manager, the Area Manager acts as the local ministry representative with stakeholders on highway operations related issues and customer service delivery within their area.

Qualifications for this role include:

- Secondary School graduation or equivalent and a minimum of five years' related experience; OR,
- Diploma from a recognized Institute of Technology (e.g. Applied Science Technologists and Technicians of BC) in a related field of study and a minimum of 3 years' related experience; OR,
- University or college degree in a related field of study and one year of related experience; OR,
- Professional Engineer and one year of related experience.
 - "Related field of study" means study in the field of civil engineering, structural engineering, construction technology, surveying, geology, geography, or project management.
 - "Related experience" means experience in highway construction and/or maintenance, project management, contract management, traffic management surveying or audit processes, procedures and practices.

Additional Requirements:

- Valid BC Class 5 Driver's Licence in good standing.
- Successful completion of the Area Manager Roads certification program.
NOTE: The Area Manager Certificate of Completion through BCIT (or another technical institution) is required to be appointed to the AO 24 level. Successful applicants who have not received a certificate of completion must complete the certificate within one year and will be under-implemented at the AO 21 level until completion.
