

## Company Overview:

Onsite Engineering is a mid-sized consulting engineering and geoscience company with multiple offices across BC. We are a diverse company that provides high quality engineering and geoscience services to government and industry. We understand that, as professionals in the engineering field, the work we do builds the places we live, work, and play for generations and we are proud to play our part. We have purposely built our company to allow our senior professionals to do what they do best – top notch technical work.

## At Onsite, we build communities. Come join ours.

## Position Overview:

We are currently recruiting for THREE (3) Civil Engineering Technologists. The first is for our Salmon Arm office, the second is for our Prince George Office and the third is for our Abbotsford Office. The successful Civil Engineering Technologist will be involved in land development and municipal projects and will possess a strong background working with property owners and municipalities through a motivated and dynamic team of professionals. Successful applicants will participate in the provision of engineering services from proposal stage through planning, design, construction and commissioning of projects.

## Major Job Functions:

- Preparing engineering drawings for land development and municipal projects
- Coordinating project drawings and reports
- Surveying (total station and GPS)
- Site inspection
- Project management and contract administration

## Specific Skills and Knowledge:

- Flexibility, organizational and time management skills
- Excellent attention to detail, work accuracy/numeracy and quality orientated
- Strong communication and interpersonal skills and ability to build positive relationships across all levels of the business
- Motivated and dynamic self-starter
- Strong planning and organizational skills with the ability to work under pressure to tight deadlines
- Effective problem-solver with strong analytical skills
- A committed and positive attitude along with an obvious customer focus and the ability to build a positive rapport with customers

## Education and Experience:

- Diploma in Civil Engineering Technology or equivalent experience
- Minimum 5 years' experience in a design or project management role within a municipality and/or consulting engineering environment
- Proficient in the use of AutoCAD Civil 3D
