Marine Engineering Technologist

Are you interested in a challenging career in a fast-paced, rewarding work environment? If you are, then consider applying to Robert Allan Ltd, one of the world's leading naval architecture and engineering consulting firms in working vessel design and marine consulting.

As a Marine Engineering Technologist at Robert Allan Ltd., you will be responsible for producing ship systems diagrams and arrangements such as bilge, ballast, fuel, fire-fighting, machinery cooling, compressed air, lube oil, machinery exhaust, machinery space ventilation, domestic systems, etc. in addition to performing calculations related to the above.

You will be a member of a number of multi-disciplinary project teams, and thus enjoy active participation in many varying aspects of vessel design and marine consulting. At the same time, you will be expected to work well independently with a minimum amount of supervision.

Robert Allan Ltd. offers a competitive salary and benefits package. If you meet or exceed the job qualifications, submit your resume with confidence to email: apply@ral.ca. Only those candidates selected for interviews will be contacted.

Robert Allan Ltd. is an Equal Opportunity Employer. It is the policy of this Company to provide equal opportunity for all employees and applicants for employment without regard to race, colour, creed, religion, sex, sexual orientation, national origin, citizenship status, age, marital status, disability, pregnancy, or any other basis prohibited by provincial or federal law.

About Robert Allan Ltd.

Robert Allan Ltd. is a firm of internationally-recognized Naval Architects in Vancouver, Canada. Since 1930, we have built a reputation for innovative designs for vessels of almost all types, from high-performance tugs to ferries to sophisticated research vessels.
