

MACLEOD nine
CONSULTANTS LTD

Intermediate to Senior Structural Technologist

MacLeod Nine Consultants Ltd. provides innovative and practical structural engineering services to residential, commercial, industrial, resource, public, and construction clientele. Value is added to projects by providing cost-effective structural solutions using relevant codes, practices, and innovative structural technologies. Engineering services are provided with integrity, from project start to finish, including planning, concept and design review, detailed design, assessment of existing structures, and field reviews.

Key responsibilities include but may not be limited to:

- Preparation of structural drawings for residential, commercial, and industrial facilities
- Ensure layout conforms to functional requirements and company standards
- Preparation specification information for review by Engineers
- Coordinate work with architects and other engineering disciplines
- Following company policies and procedures to maintain consistency and a quality product
- Coordinate required field reviews and provide documentation if required
- Assist in the preparation of project timelines and work schedules

Requirements:

- Diploma or certificate in Civil Technology, or relevant experience
- Minimum 5 years progressive experience in building structural design
- 5+ years AutoCad experience, and/or equivalent software experience
- REVIT experience would be considered and asset
- Excellent communications skills
- Team player and independent worker
- Class 5 drivers license

Benefits:

- Compensation will be competitive and commensurate with experience
- Flexible schedules
- Comprehensive benefit plan

How to Apply: Please send your cover letter and resume to alison@macleod-9.com with “Structural Technologist” in the subject line. While we appreciate all applications, only those who are selected for an interview will be contacted.
