

Engineers

Junior Structural Restoration Technologist

Specializing in structural engineering, building science, structural restoration, structural glass and façade engineering and parking facility design and restoration, RJC Engineers is one of North America's leading engineering firms. With a staff of more than 500 employees in eleven locations across the country, we offer highly personalized service at the local level with the expertise, depth and resources of a large, national firm.

We are proud of our ability to balance creativity with practicality to help our clients achieve their vision. To us, creativity means working collaboratively to find distinctive and effective solutions for every project, developing new techniques and processes when called for, and knowing how and when to adapt proven methods and apply the most beneficial technology.

Creativity starts with the ingenuity of our people.

We have a culture of learning and facilitating growth of skills and capabilities; of helping our people fulfil their potential through coaching, teamwork, challenging work assignments and open communications. We strongly believe that if you feel engaged and driven to excel, you will enjoy your daily work experience, and that will result in a level of service that will keep our clients coming back.
