

Creative Thinking
Practical Results

CAD/BIM Project Technologist

Specializing in structural engineering, building science, structural restoration, structural glass and façade engineering and parking facility design and restoration, RJC Engineers is one of North America's leading engineering firms. With a staff of more than 500 employees in eleven locations across the country, we offer highly personalized service at the local level with the expertise, depth and resources of a large, national firm.

We are proud of our ability to balance creativity with practicality to help our clients achieve their vision. To us, creativity means working collaboratively to find distinctive and effective solutions for every project, developing new techniques and processes when called for, and knowing how and when to adapt proven methods and apply the most beneficial technology. **Creativity starts with the ingenuity of our people.**

We have a culture of learning and facilitating growth of skills and capabilities; of helping our people fulfil their potential through coaching, teamwork, challenging work assignments and open communications. We strongly believe that if you feel engaged and driven to excel, you will enjoy your daily work experience, and that will result in a level of service that will keep our clients coming back.

Location: Vancouver, BC

Start Date: As soon as possible

Candidate Profile:

As the CAD/BIM Project Technologist you are able to read and interpret structural drawing with ease. You enjoy a role where you have the freedom to work independently and also part of a team. A hard worker, ready to take on added responsibility. You enjoy mentoring others, with your own desire for professional growth and development.

Key Responsibilities

Duties include, but are not limited to:

- Fulfill the role of CAD/BIM Project Technologist on a variety of exciting and complex projects
- Supervise the production of drawings for entire projects and coordinate RJC drawings with other members of the project team
- Maintain regular contact with designated clients on projects
- Ensure a consistent quality of work and format, while considering the input of several designers and drafters of varying experience and styles
- Develop new ways of presenting/exchanging information by using rapidly evolving technology in order to meet a variety of client requirements
 - Be accountable to Project Engineers for drawing production and quality
 - Support, mentor, and assist in the training of Junior CAD/BIM Technologists

Professional Qualifications & Experience

- Diploma in Civil Engineering Technology, Architectural Technology and/or Engineering Design & Drafting Technology (Structural option)
- Minimum 5 years' experience with Revit
- 5 years' construction/consulting experience considered an asset

*This position includes a comprehensive group benefits package, discretionary performance bonuses, and annual salary reviews.
