ENGINEERING TECHNOLOGIST III  
(Wastewater)

The City of Campbell River is seeking an experienced Engineering Technologist III to join our Wastewater Department team.

Why Campbell River?
Voted one of the Best Cities to Work in BC by BC Business magazine in 2018, Campbell River offers a rare combination of a welcoming small town feel with large city amenities. From summer markets and street events to an active arts and culture community to year-round, world class recreational opportunities, the Campbell River lifestyle is unparalleled. We are 45 minutes from the top of Mt. Washington and just minutes from over 100 km of all level of mountain biking and hiking trails and are surrounded by ocean, rivers and lakes for sports fishing, kayaking, paddle boarding… and whale watching.

The Rewards!
The rate of pay for this permanent, full-time, CUPE bargaining unit position is $39.35 per hour based on a 40-hour work week and includes a comprehensive benefits package. What else?
You will be provided with the opportunity:
- To lead and develop new programs and initiatives;
- For ongoing professional development;
- To work with great people in a supportive, team environment.

The Job...
As part of the integrated wastewater services team, you will work in a fast-paced and customer focused environment. Working with the exempt supervisor, you will be actively involved in the design, project management, contract administration and construction supervision functions related to the maintenance, rehabilitation, replacement and new construction of municipal treatment facilities, lift stations and underground infrastructure.

You will play a key role in developing and delivering the City’s new in-house sanitary sewer CCTV video inspection program to assess current condition of existing infrastructure and establish effective maintenance and rehabilitation programs; and in leading a sewer system I/I and flow modeling program. In addition you will administer contracts and manage small projects; write technical reports; review engineer drawings for new development; draft bylaws, procedures, risk management plans, and policies; and input data to asset management and GIS databases. Work is performed both in the office and field environment.

To be successful in this role, you will have:
- Excellent analytical, problem solving and communication skills;
- Minimum of five (5) years’ relevant technical experience in water and/or wastewater within last 10 years;
- A two (2) year diploma in Civil Engineering or relevant field such as water, wastewater or environmental technology from a recognized post-secondary education institution;
- Be registered or eligible for registration as an AScT with ASTTBC or other self-regulated professional association relevant to the position;
- Possess and maintain a valid BC Class 5 Drivers’ Licence.

Bring your innovative approach and extensive experience in civil engineering and the water or wastewater industry to our high functioning, dynamic work environment where you will be provided with opportunities to continue to grow and learn new skills.

For a detailed job description that lists all the duties and necessary qualifications for this position, please visit the “Employment Opportunities” section of our website at www.campbellriver.ca.

Please include verification of your education and certifications with your application.

This posting closes at 4:30 pm on Sunday, March 1, 2020
