

## Technologist

Specializing in structural engineering, building science, and restoration, RJC Engineers is one of North America's leading engineering firms. With a staff of more than 600 employees in twelve locations across the country, we offer highly personalized service at the local level with the expertise, depth and resources of a large, national firm.

We are proud of our ability to balance creativity with practicality to help our clients achieve their vision, and understand that **creativity starts with the ingenuity of our people**. We have a culture of learning and facilitating growth of skills and capabilities; of helping our people fulfill their potential through coaching, teamwork, challenging work assignments and open communications. We strongly believe that if you feel engaged and driven to excel, you will enjoy your daily work experience, and that will result in a level of service that will keep our clients coming back.

**LOCATION:** Victoria, BC & Nanaimo, BC

**START DATE:** Immediately

### Candidate Profile

The Technologist will work as an active team member within project teams, from conceptual and preliminary stages of the project design through to its completion. The successful candidate is a self-motivated, fast learner with a desire to continually learn and grow and has a passion for Building Science and Restoration. A commitment to providing exceptional client service and developing technical expertise to deliver practical, creative solutions.

### KEY RESPONSIBILITIES:

Duties include, but not limited to:

- Site investigation and evaluation of existing buildings.
- Preparation of reports and studies.
- Preparation of drawings for cladding and fenestration projects.
- Preparation of drawings and specifications for rehabilitation projects.
- Assist Project Managers in the implementation of structural restoration and building envelope projects during both the assessment and construction stages of the project.
- Design and analysis to determine effective repair alternatives.
- Coordination with other engineering and architectural disciplines.
- Contract administration/construction review while implementing restoration work.
- Client liaison.

**PROFESSIONAL QUALIFICATIONS:**

## EDUCATION

- Diploma in civil/structural/architectural technology from accredited technical college
- Registered or eligible to register as a Graduate Technologist/Technician with Applied Science Technologists and Technicians of British Columbia.

## EXPERIENCE

- 1 – 2 years' previous experience in Building Science an asset.
- Experience in a consulting firm environment considered an asset.
- Experience with drafting considered an asset.
- Experience with construction considered an asset.

## SKILLS

- Committed to client service and technical excellence.
- Ability to communicate graphically using Revit, CAD, Sketch-up, or equivalent/similar.
- Fast learner with a desire to grow professionally and personally.
- Team player with ability to work independently with minimum direction.
- Hard worker, ready to assume responsibility quickly and have fun at the same time.
- Inquisitive, clear thinker who can determine what work is required and who can draw rational conclusions from information available.
- Demonstrated and effective communication skills – both written and verbal.
- Ability to conceptualize in three dimensions and use 3D drafting and modelling tools.
- Aptitude for working with existing facilities and comfortable working at heights.

\*This position includes a comprehensive group benefits package, discretionary performance bonuses, and annual salary reviews.
