

**WESTBROOK**  
**Consulting Ltd.**

## **Civil Engineering Technologist / Technician**

### **Victoria, BC**

Westbrook Consulting is a locally owned company specializing in Municipal Infrastructure and Land Development Engineering. Located in the West Shore area of Victoria BC, Westbrook is a leader in Land Development Engineering & Consulting in the Capital Regional District as well as the Cowichan Valley.

We are currently seeking an experienced Civil 3D Engineering Technologist / Technician to join our team.

The successful candidate's role will include the design of municipal infrastructure for public and private sector clients, using AutoCAD Civil 3D software.

The job will include the preparation of conceptual and detailed design drawings for site grading, road design, water / sewer / storm drainage, as well as working with the engineers on the design of low impact development features to mitigate the impact to the local environment.

The ideal candidate will possess the following qualifications:

- Proficiency with AutoCAD Civil 3D
- 3+ years of experience in a civil engineering technology role, preferably in municipal infrastructure
- Graduate of a Civil Engineering Technology / Technician program
- Registered or eligibility to register with ASTTBC as an Applied Science Technologist or Technician is preferred
- A positive personality, with client-driven perspective
- Strong written and verbal communication skills
- Excellent organization and planning skills
