

COMPANY

Western Pacific Engineering Group Ltd. (WPEG) is a small family-owned Engineering firm engaged in civil Engineering services within the beautiful Fraser Valley in B.C. and beyond. We are searching for a full-time junior to intermediate civil Engineering Technologist/Technician to be a key member of our diverse and professional team. The position will be based out of our Mission office .

WPEG provides a range of services to our clients including onsite sewerage system design (from small, single homes to larger municipal systems), land development and municipal infrastructure design. We are committed to providing professional services to our valuable clients ranging from investors, developers, architects, realtors to homeowners.

WPEG proffer a welcoming team environment which fosters personal and professional growth to build your career in an environment that recognizes talent promoting respect and inclusion for all. We offer competitive compensation as well as a comprehensive benefits package. We also provide job training and mentorship programs.

REQUIREMENTS FOR THE POSITION:

- Have a diploma or bachelor's degree in civil Engineering
- 1-2 years experience using AutoCAD Civil 3D
- Fluent in reading, writing and oral communication in English (day-to-day communications as well as technical)
- A positive attitude and attention to detail is crucial
- Ability to work well in a collaborative, team environment.
- Have a BC driver's licence (or be eligible to receive one)
- Registered or eligible for registration with Engineers and Geoscientists BC is considered an asset
- Experience in a consulting Engineering environment is also an asset
- Effective organizational and time management skills in handling multiple projects, performing a variety of tasks, and meeting required deadlines; and
- Excellent interpersonal skills, conduct and ethical behaviour.

RESPONSIBILITIES INCLUDE:

Applicants should expect primarily office-based duties (70% to 80%) and will be involved in preparing AutoCAD Civil 3D design packages for Engineered land development design, and other resource-related infrastructure projects. Successful candidates will join our team of Engineers and Geoscientists BC accredited staff. Responsibilities for this position will include, but are not limited to:

- Preparation of civil Engineering drawings, calculations, specifications, cost estimates, reports and required correspondence

- Applying Engineering and project management skills to administer projects to successful completion
- Land development and municipal infrastructure work from preliminary concepts and sketches into Engineering designs, plans and project informational requirements, using Civil 3D, as well as other technical software as needed.
- Coordinate and assist in the preparation of documents required for project approvals
- Carry out site inspections duties and work progress reviews
- Be familiar with regulations, best practices, and performance standards detailed in the Master Municipal Construction Document (MMCD) and City's Bylaws.
- Business and client management including with other consultants, contracting firms, architects, municipalities, government departments, and utility providers as needed.
- Find solutions to municipal and client requests & designs.

APPLICATION

If you are interested in working with us, please forward your resume with cover letter to claudia@westpeng.com. Applications will be accepted until the position is filled. We look forward to hearing from you!

We thank all applicants for their interest; however, only those selected for an interview will be contacted.
