<b>HOURS OF WORK:</b>	<b>35 HOURS / WEEK</b>	<b>SALARY:</b>	<b>\$75,168 - \$88,828 annually plus benefits (2021 rates)</b>

The City of New Westminster has an ambitious Master Transportation Plan, and requires a forward-thinking, motivated and dynamic transportation technologist to help achieve the City's transportation goals. With a focus on making it safer, more comfortable and more convenient for people of all ages and abilities to walk, ride a bike and take transit in New Westminster, this is a key Transportation Section support role. Your duties will include: reviewing traffic management plans and issuing permits for temporary street use (including preparing traffic management plans for special events); data collection, management, and analysis; reviewing and responding to public inquiries, both written and verbal; performing site inspections; preparing sign/paint plans and conceptual geometric designs of low to medium complexity; supporting project management and implementation for capital projects; contributing to transportation planning projects; and preparing and maintaining a range of data sets, records, reports, technical analysis, and documentation related to the work.

**If you have the following characteristics and qualifications, we want to hear from you:**

- Graduation from an Institute of Technology with a Diploma in Engineering Technology, plus related experience, preferably in a municipal transportation setting. An equivalent combination of training and experience may be considered.
- Knowledge of the City of New Westminster's 2015 Master Transportation Plan, the City's multi-modal transportation system, the City's Bold Steps toward Climate Action, and current municipal transportation principles, standards and methods.
- Knowledge and strong understanding of current transportation design and traffic control guidelines and their applicability to all road users.
- Knowledge of traffic data sets and experience in the preparation or review of transportation studies required for private land development would be an asset.
- Knowledge and experience in road safety principles.
- Knowledge of the roles and responsibilities of the external agencies involved in transportation issues affecting the City.
- Experience in reviewing, commenting on, preparing, and approving traffic management plans for construction and special events on City streets.
- Ability to administer assigned transportation projects, collect, organize, analyze and/or synthesize technical, statistical, financial and related data and information.
- Ability to establish and maintain effective working relationships with people at all levels, both inside and outside of the City, and to interact with the public in a professional manner.
- Ability to prepare, read and interpret plans, specifications, contract documents and related material.
- Ability to prepare and maintain records, reports, correspondence and various other work-related materials.
- Experience in geometric and sign/pavement marking design using AutoCAD preferred.
- Familiarity with current traffic analysis software such as Synchro would be an asset.

\*This is a 2-year term with the possibility of an extension.
