

Mission is located in the lower mainland of BC and is nestled on the southern coastal mountain slopes overlooking the lush Fraser River Valley. Mission is a rapidly growing and dynamic community of approximately 41,500 residents located 15 minutes north of the US border and 70 kilometers east of Vancouver. Although Mission is part of a broader metropolitan area, it still maintains its distinct and welcoming small town flavour.

If...

working for a growing community and making a difference...
working for a progressive employer in the beautiful Fraser Valley...
working with an exceptional team, appeals to you...

You may be the person we are seeking.

MANAGER OF ENVIRONMENTAL SERVICES

Are you passionate about protecting the environment while providing services for the community? If so, this might be the job for you!

The City of Mission is looking for a Manager of Environmental Services to manage the City's environmental services programs, such as the landfill, curbside collection, watercourse protection, and climate action programs. This position also provides corporate and strategic advice for a range of environmental initiatives and policies. This position will also enact the Environmental Charter.

More specifically, in this role you will manage a team that promotes the City's environmental sustainability program by planning, developing and implementing the City's environmental programs and initiatives, such as solid waste management (landfill, curbside collection, recycling depot, compost facility). You will look after the ecosystems including watercourse and riparian area protection, wildlife management, species-at-risk and invasives management. Climate action and energy management, air emissions and quality, aquifers and ground water, slope stability and contaminated soil also fall into your portfolio.

You will need your excellent interpersonal skills and communication skills as you represent the City to both internal and external stakeholders. Your business sense and financial acumen will assist you in developing and monitoring budgets, contracts, and business plans. Your knowledge of legislation and regulatory regimes will help you ensure the City's compliance to these regulations.

As the ideal candidate, you will have a post-secondary degree in an Environmental science or related field, and a minimum of 5 to 7 years of experience in a government setting, including two years of management experience. You will have previous experience developing and monitoring environmental sustainability initiatives.

This excluded position offers a wage rate commensurate with your qualifications and experience along with a comprehensive benefits package, municipal pension plan, a 9-day fortnight work schedule and the opportunity to work with an excellent team.

If this career opportunity interests you, please apply via the Careers page on our website www.mission.ca/careers (Job ID 2023-02) by Sunday, March 12, 2023.

We thank all interested candidates however, only those selected for an interview will be contacted.
