### **Radio Communications Technologist**

**\$63,446.31 - \$72,142.65 annually plus \$34.20 bi-weekly Isolation Allowance for Smithers**

Natural Resource Information & Digital Services (NRIDS) is the information management/information technology (IM/IT) service provider and organizational partner to the Natural Resource Ministries (NRM). As the centralized authority for all information, geospatial data, and technology across the NRM, NRIDS is leading the transformation and modernization of business practices through new and innovative technology solutions, continuous improvement projects and operational IM/IT solutions.

The Radio Communications Technologist reports to the Superintendent, Radio Communications, and provides technical services and analysis to ministry staff within the Natural Resource Sector. The position plans, installs and upgrades radio, wireless and data communications support services for emergency Wildfire communications and electronic weather data support, coordinates business applications and user technology training, and manages support for the ministries radio systems network to meet its operational mandate in order to maintain year-round safety communications for staff and for the general public during emergency situations.

The BC Public Service is committed to creating a [diverse workplace](#) to represent the population we serve and to better meet the needs of our citizens. Consider joining our team and being part of an innovative, inclusive and rewarding workplace.
