

Civil Engineering Technologist

Position Details: Full-time, Permanent

Salary Range: 65,100 - \$81,400

Location: Central and Northern BC/Hybrid

Closing Deadline: May 23, 2023 (11:59PM EDT)

Who We Are

Ducks Unlimited Canada (DUC), one of the nation's leading conservation organizations, is a passionate community of people who believe that nature is the foundation of strong communities, a prosperous economy and a sustainable future that supports the hopes and dreams of the next generation. Together, we conserve and restore some of the most valuable and threatened landscapes on the planet.

What You Will Do

As a member of the DUC BC Engineering Team, you will be responsible for primarily supervising and managing construction of water control structures, but also supporting the engineering team with planning, construction procurement, cost estimation, and design – activities that appeal to you because you love a balance of office work and field work. You will regularly travel to remote field sites for construction or to assist with inspections and operation and maintenance of small dams and water control structures. Your level of experience will allow you to work and supervise construction with a degree of independence.

You are an enthusiastic team player but also enjoy independently problem solving and thinking out of the box. You are self-motivated, enjoy a complex, changing environment and can manage numerous projects on tight deadlines.

Your minimum three years of experience, and strong technical capabilities make you the ideal candidate for this position. Practical experience with water control structures, conservation projects, ATV operation, using small tools, agriculture and/or biology, experience towing trailers, would all be considered assets to this very diverse and challenging opportunity.

Requirements

- A Diploma in Civil Engineering Technology,
- Awareness of WorkSafe BC and BC OHS Regulation, BC Dam Safety Regulation, Water Sustainability Act is an asset.
- Proficiency with Civil 3D and AutoCAD is an asset.
- Ability to read and understand engineering plans and specifications.
- Construction supervision, construction inspection, or construction management experience.
- Practical knowledge of construction involving heavy equipment, construction of drainage infrastructure and/or earthworks (dams, embankments), and strong appreciation for construction site safety.
- Pre-construction planning, tendering, contract management, cost estimation experience

- Ability to work non-standard flexible hours to suit fieldwork/construction, comfort with long-distance travel on highway and logging roads. Enjoy being out in the field and away from home during construction for up to two weeks at a time.
- Experience with topographic survey is an asset.
- Excellent organization, interpersonal communication skills, both oral and written.
- Experience with MS Word and Excel.
- Valid class 5 driver's license (BC)

What We Offer

- 3 weeks' vacation with paid personal and sick days
- Comprehensive compensation & benefits package
- Hybrid work arrangement
