Duties:

- Drafting of structural drawings
- On-site structural review of structural designs
- Preparation of technical site instructions
- Review of shop drawings

About Skyline Engineering:

Skyline Engineering is a boutique structural engineering firm located in Victoria, BC. With over 100 years' combined experience, our partners have vast structural design experience in multi-storey residential, commercial, institutional, educational, healthcare, marine, and recreation projects. When designing projects, the team combines their engineering expertise in the use of conventional and heavy timber wood frame, reinforced concrete, and steel to create efficient and unique structural designs where structural function can complement the Architectural form.

Our Professional Engineers currently hold registration in B.C. and Alberta, and most are LEED accredited. We have experience with the integrated design process and are well versed in the needs and requirements of the other members of the consulting team in order to deliver successful LEED projects. Our designs take advantage of current sustainability initiatives and practices; we are committed to reducing the environmental impact of construction and consider long-term functionality and adaptability in all our designs.

We are a growing firm that offers competitive wages and a friendly, collaborative work environment. Salary will be negotiated based on qualifications and experience.
