

PROFESSIONAL PRACTICE BULLETIN

TOPIC:	The City of Mission Fire Prevention Bylaw-RFPT Requirement (6285-2023)
PRACTICE AREA:	Fire Protection
DISCIPLINE:	All RFPT Endorsements
DOCUMENT #:	PPB-2024-FP-01
REVISION #:	1.0
DATE:	June 13, 2024

Information

This bulletin is being disseminated to the registrants of the Applied Science Technologists and Technicians of BC to inform them of the recent enactment of the Fire Prevention Bylaw by the City of Mission. The Fire Prevention Bylaw (6285-2023), providing procedural requirements for the inspection and testing of fire safety system, mandates the requirement to involve a Registered Fire Protection Technician (RFPT) or an individual possessing certifications deemed acceptable by the Authority Having Jurisdiction (AHJ) to inspect, test and maintain fire protection equipment required under the Building Code or Fire Code.

Registrants are required to stay informed of and comply with the requirements of all regulations, laws, codes, publications, and standards applicable to the jurisdiction they are providing services. Further to this, Registrants must follow all ASTTBC guidelines, standards, and bulletins applicable to their area of practice.

This marks the 24th jurisdiction in British Columbia requiring ASTTBC Registered Fire Protection Technicians to perform fire protection testing and inspection. More information on other jurisdictions throughout BC can be found using the link in the reference document listing below.
